In general, regarding BWS control activities, the control system involves all employees and officials of the Bank, including the Board of Commissioners and the Board of Directors. Therefore, control activities are planned and implemented to control risks that may affect performance or result in losses for the Bank. Control activities also include establishing control policies and procedures and earlier verification processes to ensure that these policies and practices are consistently complied with and are activities that are an integral part of every function or every day-to-day activity of the Bank.

BWS carries out control activities in the context of implementing the Internal Control System:

- Management review (*Top Level Reviews*) Bank Directors periodically request explanations (information) and operational performance reports from officials and employees so that it is possible to review progress (realization) compared to targets to be achieved, such as financial reports compared to planned budgets set. Based on this review, the Board of Directors immediately detects problems such as control weaknesses, financial statement errors, or other irregularities (*fraud*)
- Operational Performance Review (*Functional Review*) This review is carried out by the Internal Audit Division with a higher frequency, daily, weekly and monthly reviews.

- » Melakukan kaji ulang terhadap penilaian risiko (laporan profil risiko) yang dihasilkan oleh satuan kerja manajemen risiko.
- » Menganalisis data operasional, baik data yang terkait dengan risiko maupun data keuangan, yaitu melakukan verifikasi rincian dan kegiatan transaksi dibandingkan *output* (laporan) yang dihasilkan oleh satuan kerja manajemen risiko.
- » Melakukan kaji ulang atas realisasi pelaksanaan rencana kerja dan anggaran, guna:
 - » Mengidentifikasi penyebab penyimpangan yang signifikan.
 - » Menetapkan persyaratan untuk tindakan dan perbaikan (corrective action).
- » Conducting a review of the risk assessment (risk profile report) produced by the risk management work unit.
- » Analyzing operational data related to risk and financial data, verifying details and transaction activities compared to output (reports) generated by the risk management work unit.
- » Conduct a review of the realization of the implementation of the work plan and budget:
 - » Identify causes of significant deviations.
 - » Define requirements for corrective action).

Pengendalian Sistem Informasi dan Teknologi

Control of Information Systems and Technology

- Bank melaksanakan verifikasi terhadap akurasi dan kelengkapan dari transaksi dan melaksanakan prosedur otorisasi, sesuai dengan ketentuan intern.
- Kegiatan pengendalian sistem informasi dapat digolongkan dalam dua kriteria, yaitu pengendalian umum dan pengendalian aplikasi.
 - » Pengendalian umum (*general control*) meliputi pengendalian terhadap operasional pusat data, sistem pengadaan dan pemeliharaan software, pengamanan akses, serta pengembangan dan pemeliharaan sistem aplikasi yang ada. Pengendalian umum ini diterapkan terhadap *mainframe*, server, dan *users workstation*, serta jaringan internal - eksternal.
 - » Pengendalian aplikasi (*application controls*) diterapkan terhadap program yang digunakan Bank dalam mengolah transaksi dan untuk memastikan bahwa semua transaksi adalah benar, akurat dan telah diotorisasi secara benar. Selain itu, pengendalian aplikasi harus dapat memastikan tersedianya proses audit yang efektif dan untuk mengecek kebenaran proses audit dimaksud.
 - The Bank verifies the accuracy and completeness of transactions and carries out authorization procedures by internal regulations.
 - Information system control activities can be classified into two criteria: general controls and application controls.
 - » General control includes control over data center operations, software procurement and maintenance systems, access security, and development and maintenance of existing application systems. This general control is applied to mainframes, servers, users' workstations, and internal-external networks.
 - » Application controls are applied to programs used by the Bank to process transactions and ensure that all transactions are correct, accurate, and properly authorized. In addition, application controls must be able to provide the availability of an effective audit process and to check the correctness of the intended audit process.

Pengendalian Aset Fisik

Control of Physical Assets

Pengendalian aset fisik dilaksanakan untuk menjamin terselenggaranya pengamanan fisik terhadap aset Bank.

- Kegiatan ini meliputi pengamanan aset, catatan dan akses terbatas terhadap program komputer dan file data, serta membandingkan nilai Aset dan kewajiban Bank dengan nilai yang tercantum pada catatan pengendali, khususnya pengecekan nilai aset secara berkala.

Physical asset control is carried out to ensure the implementation of physical security for the Bank's assets.

- This activity includes safeguarding assets, records, and limited access to computer programs and data files, as well as comparing the value of the Bank's assets and liabilities with the values listed on the control records, in particular checking the value of assets periodically.

Dokumentasi

Documentation

- Bank sekurang-kurangnya memformalkan dan mendokumentasikan kebijakan, prosedur, sistem dan standar akuntansi serta proses audit secara memadai.
- Dokumen tersebut harus diperbarui secara berkala guna menggambarkan kegiatan operasional Bank secara aktual, dan diinformasikan kepada pejabat dan pegawai.
- Atas suatu permintaan, dokumen harus senantiasa tersedia untuk kepentingan auditor intern, akuntan publik dan otoritas pengawasan Bank.
- Akurasi dan ketersediaan dokumen harus dinilai oleh auditor intern ketika melakukan audit rutin maupun non rutin.

- Banks at least formalize and adequately document policies, procedures, systems and accounting standards and audit processes.
- The document must be updated regularly to describe the actual operational activities of the Bank, and to inform officials and employees.
- Upon request, documents must always be available for the benefit of the internal auditors, public accountants and the Bank's supervisory authority.
- The accuracy and availability of documents must be assessed by the internal auditors when conducting routine and non-routine audits.

Selain berbagai hal di atas, dapat disampaikan juga aktivitas pemisahan fungsi yang merupakan bagian dalam aktivitas pengendalian yang dimaksudkan agar setiap orang dalam jabatannya tidak memiliki peluang untuk melakukan dan menyembunyikan kesalahan atau penyimpangan dalam pelaksanaan tugasnya pada seluruh jenjang organisasi dan seluruh langkah kegiatan operasional yaitu sebagai berikut:

- Mematuhi prinsip pemisahan fungsi ini, yang dikenal sebagai "Dual Control".
- Menetapkan prosedur (kewenangan), termasuk penetapan daftar petugas yang dapat mengakses suatu transaksi atau kegiatan usaha yang berisiko tinggi.
- Menghindari pemberian wewenang dan tanggung jawab yang dapat menimbulkan berbagai benturan kepentingan (*conflict of interest*). Seluruh aspek yang dapat menimbulkan pertentangan tersebut diidentifikasi, diminimalisir, dan dipantau secara hati-hati oleh pihak lain yang independen.
- Dalam pelaksanaan pemisahan fungsi tersebut, Bank melakukan langkah-langkah, antara lain:

In addition to the various things above, it can also be conveyed that the segregation of duties is part of the control activities, which is intended so that everyone in his position does not have the opportunity to make and hide mistakes or deviations in the implementation of his duties at all levels of the organization and all steps of operational activities, namely as follows:

- Follow this principle of separation of functions, known as "Dual Control".
- Establishing procedures (authorities), including establishing a list of officials who can access a high-risk transaction or business activity.
- Avoiding the granting of authority and responsibility which could lead to various conflicts of interest. All aspects that may give rise to a conflict of interest are identified, minimized and monitored carefully by another independent party.
- In implementing the segregation of duties, the Bank took steps, among others:

- » Menetapkan fungsi dan tugas tertentu pada Bank yang dipisahkan atau dialokasikan kepada beberapa orang dalam rangka mengurangi risiko terjadi manipulasi data keuangan atau penyalahgunaan aset Bank;
- » Pemisahan fungsi tersebut tidak terbatas pada kegiatan *front* dan *back office*, tetapi juga dalam rangka pengendalian terhadap:
 - Persetujuan atas pengeluaran dana dan realisasi pengeluaran
 - Rekening nasabah dan rekening pemilik Bank
 - Transaksi dalam pembukuan Bank
 - Pemberian informasi kepada nasabah Bank
 - Penilaian terhadap kecukupan dokumentasi perkreditan dan pemantauan debitur setelah pencairan kredit
 - Kegiatan usaha lainnya yang dapat menimbulkan benturan kepentingan yang signifikan
 - Independensi fungsi manajemen risiko pada Bank
- » Assign certain functions and tasks at the Bank that are separated or allocated to several people to reduce the risk of manipulation of financial data or misuse of Bank assets;
- » Separation of functions is not limited to front and back office activities but also in the context of controlling:
 - Approval of disbursement of funds and realization of expenditure
 - Customer accounts and Bank owner accounts
 - Transactions in the bookkeeping of the Bank
 - Provision of information to customers of the Bank
 - Assessment of the adequacy of credit documentation and monitoring of debtors after credit disbursement
 - Other business activities that may give rise to a significant conflict of interest
 - The independence of the risk management function at the Bank

Tinjauan atas Efektivitas Sistem Pengendalian Internal

Review of the Effectiveness of the Internal Control System

Evaluasi Efektivitas Sistem Pengendalian Internal Bank senantiasa melakukan pemantauan secara terus menerus terhadap efektivitas keseluruhan pelaksanaan pengendalian internal. Pemantauan terhadap risiko utama Bank harus diprioritaskan dan berfungsi sebagai bagian dari kegiatan Bank sehari-hari termasuk evaluasi secara berkala, baik oleh satuan-satuan kerja operasional maupun Satuan Kerja Audit Internal.

Bank juga memantau dan mengevaluasi kecukupan sistem pengendalian interen secara terus menerus berkaitan dengan adanya perubahan kondisi intern dan ekstern serta harus meningkatkan kapasitas Sistem Pengendalian Internal tersebut agar efektivitasnya dapat ditingkatkan.

Secara garis besar, langkah-langkah yang dilakukan Bank dalam rangka memastikan terselenggaranya kegiatan pemantauan yang efektif, antara lain:

- Memastikan bahwa fungsi pemantauan telah ditetapkan secara jelas dan terstruktur dengan baik dalam organisasi Bank.
- Menetapkan satuan kerja/pegawai yang ditugaskan untuk memantau efektivitas pengendalian intern.
- Menetapkan frekuensi yang tepat untuk kegiatan pemantauan yang didasarkan pada risiko yang melekat pada Bank dan sifat/frekuensi perubahan yang terjadi dalam kegiatan operasional.
- Mengintegrasikan Sistem Pengendalian Internal ke dalam kegiatan operasional dan menyediakan laporan rutin seperti jurnal pembukuan, *management review* dan laporan mengenai persetujuan atas eksepsi/penyimpangan dari kebijakan dan prosedur yang ditetapkan (justifikasi atas *irregularities*) yang selanjutnya dilakukan kaji ulang.
- Melakukan kaji ulang terhadap dokumentasi dan hasil evaluasi dari satuan kerja/pegawai yang ditugaskan untuk melakukan pemantauan.
- Menetapkan informasi/feedback dalam format dan frekuensi yang tepat.

Evaluation of the Effectiveness of the Internal Control System
The Bank continuously monitors the overall implementation of internal controls. Monitoring of the Bank's main risks must be prioritized and function as part of the Bank's daily activities, including periodic evaluations, both by operational work units and the Internal Audit Work Unit.

The Bank also monitors and evaluates the adequacy of the internal control system continuously regarding changes in internal and external conditions and must increase the capacity of the Internal Control System so that its effectiveness can be improved.

The Bank took steps to ensure the implementation of practical monitoring activities, among others:

- Ensuring that the monitoring function has been clearly defined and well structured within the Bank's organization.
- Establish work units/employees assigned to monitor the effectiveness of internal control.
- Determine the appropriate frequency for monitoring activities based on the risks inherent in the Bank and the nature/frequency of changes that occur in operational activities.
- Integrate the Internal Control System into operational activities and provide routine reports such as bookkeeping journals, management reviews, and statements regarding approval of exceptions/deviations from established policies and procedures (justification of irregularities), which are then reviewed.
- Conducting a review of the documentation and evaluation results from the work unit/employee assigned to monitor.
- Define information/feedback in the correct format and frequency.

Manajemen Risiko

Risk Management

Manajemen risiko adalah serangkaian metodologi dan prosedur yang digunakan untuk mengidentifikasi, mengukur, memantau, dan mengendalikan risiko yang timbul dari seluruh kegiatan usaha Bank, termasuk upaya untuk memitigasi dan atau meminimalkan kerugian finansial maupun non finansial yang mungkin timbul dari produk atau aktivitas bank, hubungan antara bank dengan nasabah maupun dalam internal Bank.

Risk management is a series of methodologies and procedures used to identify, measure, monitor, and control risks arising from all business activities of the Bank, including efforts to mitigate and/or minimize financial and non-financial losses that may occur from bank products or actions, the relationship between Bank with customers as well as within the Bank internally.

Dasar Penerapan Manajemen Risiko

Basis for Implementation of Risk Management

Penerapan Manajemen Risiko di BWS mengacu pada Peraturan Otoritas Jasa Keuangan (POJK) tentang Penerapan Manajemen Risiko Bagi Bank Umum Nomor 18/POJK.03/2016 tanggal 16 Maret 2016 dan Surat Edaran Otoritas Jasa Keuangan (OJK) Nomor 34/SEOJK.03/2016 tentang Penerapan Manajemen Risiko Bagi Bank Umum.

Implementing Risk Management at BWS refers to the OJK Regulation (POJK) concerning implementing Risk Management for Commercial Banks Number 18/POJK.03/2016 dated March 16, 2016 and OJK Circular Letter (OJK) Number 34/SEOJK.03/2016 concerning the Implementation of Risk Management for Commercial Banks.

Kerangka Kerja Manajemen Risiko

Risk Management Framework

BWS menetapkan pendekatan pengelolaan risiko dan kerangka pengendalian di mana risiko dikelola untuk mendapatkan keseimbangan antara risiko (*risk*) dan pendapatan (*return*). Penerapan kerangka kerja manajemen risiko dilakukan melalui perumusan tingkat risiko yang akan diambil (*risk appetite*), dan toleransi risiko (*risk tolerance*) bagi setiap jenis risiko, pengembangan kebijakan dan prosedur manajemen risiko yang berkesesuaian serta pengembangan struktur pengendalian internal secara terpadu. Selain itu, Bank juga membangun budaya risiko yang menitikberatkan kesadaran seluruh karyawan akan risiko dan efektivitas proses manajemen risiko di dalam organisasi BWS dalam menghadapi pandemi.

BWS establishes a risk management approach and control framework in which risks are managed to obtain a balance between risk (*risk*) and income (*return*). The application of the risk management framework is carried out by formulating the level of risk to be taken (*risk appetite*) and risk tolerance for each type of risk, developing appropriate risk management policies and procedures, and developing an integrated internal control structure. In addition, the Bank also builds a risk culture that emphasizes awareness of all employees on risks and the effectiveness of the risk management process within the BWS organization in dealing with a pandemic.

Untuk tetap menjaga kondisi lingkungan bisnis dan pertumbuhan Bank, serta fokus manajemen risiko di tahun 2022 terdapat beberapa eksposur risiko utama bank yang perlu menjadi perhatian.

To maintain the condition of the business environment and the growth of the Bank, as well as focus on risk management in 2022, several primary bank risk exposures need attention.

Tata Kelola dalam Manajemen Risiko

Governance in Risk Management

Penerapan manajemen risiko Bank dikelola melalui pembentukan Komite Pemantau Risiko pada tingkat Dewan Komisaris serta Komite Manajemen Risiko dan Asset & Liability Committee (ALCO) pada tingkat Direksi.

Sesuai kewenangan yang didelegasikan oleh Dewan Komisaris, Komite Pemantau Risiko mengevaluasi kebijakan manajemen risiko, dan memantau implementasinya, mengembangkan budaya pengelolaan risiko serta memastikan sumber daya yang memadai telah dikembangkan untuk memastikan pengelolaan risiko di Bank. Sementara Komite Manajemen Risiko bertanggung jawab kepada Presiden Direktur dengan tugas utamanya menyusun dan memperbarui kebijakan manajemen risiko serta mengkoordinir penerapannya, memantau kecukupan permodalan Bank terhadap eksposur risiko sesuai dengan ketentuan yang berlaku, dan menilai keseluruhan komposisi risiko dalam portofolio Bank.

Direktur Risiko & Kepatuhan (selaku Direktur yang ditugaskan khusus dalam penerapan manajemen risiko) mengelola Satuan Kerja Manajemen Risiko dan Satuan Kerja Kepatuhan yang independen terhadap fungsi Bisnis dan Operasional Bank serta fungsi yang melakukan Audit. Satuan Kerja Manajemen Risiko dan Satuan Kerja Kepatuhan bertanggung jawab melakukan pemantauan pelaksanaan manajemen risiko dan mengkaji secara berkala terhadap proses manajemen risiko termasuk pengkajian setiap usulan produk dan aktivitas baru.

Dalam rangka proses pengukuran dan pemantauan risiko, Departemen Manajemen Risiko menyusun laporan profil risiko yang merupakan laporan penilaian terhadap eksposur risiko yang melekat pada aktivitas fungsional (*inherent risk*) serta kecukupan sistem pengendalian risiko (*risk control system*). Laporan profil risiko disusun dan disampaikan secara berkala minimal secara triwulan yang dilaporkan kepada Direksi dan Komite Manajemen Risiko.

Penerapan manajemen risiko di lingkup BWS meliputi empat pilar utama dan secara ringkas dijabarkan di bawah ini.

Pilar 1

Pengawasan Aktif Dewan Komisaris dan Direksi

Dewan Komisaris dan Direksi berperan aktif dalam pengawasan penerapan manajemen risiko di lingkup Bank. Dewan

The implementation of the Bank's risk management is managed through establishing a Risk Monitoring Committee at the Board of Commissioners level as well as a Risk Management Committee and Asset & Liability Committee (ALCO) at the Board of Directors level.

Following the authority delegated by the Board of Commissioners, the Risk Monitoring Committee evaluates risk management policies, monitors their implementation, develops a risk management culture, and ensures that adequate resources have been developed to ensure risk management in the Bank. At the same time, the Risk Management Committee is responsible to the President Director with the main task of preparing and updating risk management policies and coordinating their implementation, monitoring the adequacy of the Bank's capital against risk exposure by applicable regulations, and assessing the overall risk composition in the Bank's portfolio.

The Risk & Compliance Director (as the Director assigned explicitly to the implementation of risk management) manages the Risk Management Work Unit and the Compliance Work Unit, independent of the Bank's Business and Operational functions and the role that performs the Audit. The Risk Management Work Unit and the Compliance Work Unit are responsible for monitoring the implementation of risk management and periodically reviewing the risk management process, including reviewing every new product and activity proposal.

In the risk measurement and monitoring process framework, the Risk Management Department prepares a risk profile report, which is an assessment report on the risk exposure inherent in functional activities (*inherent risk*) and the adequacy of the risk control system. Risk profile reports are prepared and submitted periodically, at least quarterly, to be reported to the Board of Directors and the Risk Management Committee.

Implementing risk management within the scope of BWS includes four main pillars and is briefly described below.

Pillar 1

Active Supervision of the Board of Commissioners and Directors

The Board of Commissioners and Directors plays an active role in supervising the implementation of risk management within the

Komisaris bertanggung jawab untuk mengevaluasi kebijakan Manajemen Risiko dan pertanggungjawaban Direksi atas pelaksanaan kebijakan Manajemen Risiko di BWS. Sedangkan Direksi bertanggung jawab untuk memaksimalkan fungsi dari manajemen risiko serta secara teratur melakukan pemantauan dan pengendalian atas setiap jenis risiko.

Pengawasan aktif Direksi dilaksanakan antara lain dengan melakukan penyusunan serta evaluasi atas kebijakan dan prosedur manajemen risiko BWS. Dalam menjalankan fungsinya menerapkan manajemen risiko yang efektif, Direksi dibantu oleh Satuan Kerja Manajemen Risiko. Pengawasan dilakukan melalui Rapat Komite Manajemen Risiko (Risk Management Committee), Komite Aset dan Liabilitas (ALMA Committee), Komite Kredit (Credit Committee) dan Gugus Tugas Anti Fraud (Anti Fraud Task Force Team).

Pengawasan aktif Dewan Komisaris dilakukan antara lain melalui persetujuan dan evaluasi atas Kebijakan Umum Manajemen Risiko yang disusun oleh Direksi. Secara berkala Dewan Komisaris melakukan evaluasi pelaksanaan kebijakan manajemen risiko melalui Rapat Direksi dan Komisaris (Radirkom) maupun dalam Rapat Komite Pemantau Risiko (Risk Monitoring Committee).

Pilar 2

Kecukupan Kebijakan, Prosedur, dan Penetapan Limit

Perumusan Kecukupan Kebijakan, Prosedur dan Penetapan Limit dilakukan pengkinian sejalan dengan sasaran strategi dan bisnis bank secara keseluruhan. Dalam implementasinya, Kebijakan-kebijakan ini di-review secara berkala dengan persetujuan sampai dengan tingkat Direksi melalui rapat komite ataupun melalui sirkulasi kepada Direksi sesuai dengan tingkat kewenangan. Direksi Bank memiliki wewenang untuk menetapkan limit risiko, tingkat toleransi bagi setiap jenis risiko, dan eksposur risiko, dengan memperhatikan pengalaman, kemampuan permodalan, kemampuan sistem dan perangkat manajemen risiko, sumber daya yang dimiliki, serta ketentuan yang berlaku.

Arahan tertulis dalam menerapkan manajemen risiko dituangkan dalam Kebijakan Manajemen Risiko harus sejalan dengan visi, misi dan strategis bisnis serta perubahan peraturan yang berlaku. Dalam implementasinya, prosedur manajemen risiko merupakan penjabaran serta aturan pelaksanaan dari Kebijakan manajemen risiko yang digunakan sebagai acuan pelaksanaan

bank. The Board of Commissioners is responsible for evaluating Risk Management policies and the accountability of the Board of Directors for the performance of Risk Management policies at BWS. Meanwhile, the Board of Directors is responsible for maximizing risk management function and regularly monitoring and controlling each type of risk.

Active supervision of the Board of Directors is carried out, among others, by compiling and evaluating BWS risk management policies and procedures. In carrying out its function of implementing effective risk management, the Board of Directors is assisted by the Risk Management Work Unit. Supervision is carried out through Risk Management Committee meetings. Asset and Liability Committee (ALMA Committee), Loan Committee, and Anti-Fraud Task Force Team.

The active supervision of the Board of Commissioners is carried out, among others, through the approval and evaluation of the General Risk Management Policy prepared by the Board of Directors. Periodically the Board of Commissioners evaluates the implementation of risk management policies through Board of Directors and Commissioners meetings (Radirkom) as well as in Risk Monitoring Committee meetings.

Pillar 2

Adequacy of Policies, Procedures, and Setting Limits

The Bank's Board of Directors can set risk limits, tolerance levels for each type of risk, and risk exposure, considering experience, capital capability, risk management system and device capabilities, resources owned, and applicable regulations. The formulation of Adequacy of Policies, Procedures, and Setting of Limits is updated in line with the bank's overall strategic and business objectives. In practice, these policies are reviewed periodically with approval up to the level of the Board of Directors through committee meetings or circulation to the Board of Directors according to the level of authority.

Written directions for implementing risk management are outlined in the Risk Management Policy, which must align with the vision, mission, and business strategy, as well as changes in applicable regulations. In its implementation, risk management procedures are the elaboration and implementation rules of the risk management policy, which are used as a reference

pengelolaan risiko setiap Unit Pengelolaan risiko. Evaluasi dan pengkinian terhadap Kebijakan dan Prosedur Manajemen risiko dilakukan secara berkala atau dalam hal terjadi perubahan secara signifikan yang mempengaruhi kegiatan usaha BWS.

Kebijakan pengelolaan risiko dituangkan dalam Rencana Bisnis Bank yang disusun secara berkala setiap awal tahun disesuaikan dengan perkembangan/perubahan yang terjadi baik internal maupun eksternal serta memperhitungkan dampaknya terhadap permodalan terutama pemenuhan Kewajiban Penyediaan Modal Minimum (KPMM). Salah satu strategi bank untuk melakukan pengendalian risiko, BWS menetapkan toleransi risiko dan limit risiko yang dilakukan review secara berkala dengan persetujuan sampai dengan tingkat Direksi melalui rapat komite ataupun melalui sirkulasi kepada Direksi sesuai dengan tingkat kewenangan.

Pilar 3

Kecukupan Proses Identifikasi, Pengukuran, Pemantauan dan Pengendalian Risiko serta Sistem Informasi Manajemen Risiko

Proses manajemen risiko meliputi tahapan Identifikasi, pengukuran, pamantauan dan pengendalian risiko terhadap 8 (delapan) jenis risiko yang dilakukan dalam rangka menganalisa sumber dan kemungkinan timbulnya risiko serta dampaknya terhadap BWS. Sedangkan pengukuran risiko dilakukan untuk mengukur eksposur risiko Bank sebagai acuan untuk melakukan pengendalian risiko. Pengukuran risiko dilakukan secara berkala baik secara kuantitatif dan/atau kualitatif sesuai metode pengukuran yang telah ditetapkan oleh regulator atau dengan menggunakan metode internal yang dikembangkan berdasarkan *best practice* dalam pengukuran risiko. Untuk mengantisipasi kondisi yang kurang baik, pengukuran risiko juga dilengkapi dengan stress testing untuk risiko kredit, pasar dan likuiditas.

Proses pemantauan risiko terhadap hasil pengukuran risiko dilakukan untuk memastikan bahwa risiko telah dikelola dengan baik antara lain dengan melakukan pemantauan terhadap limit risiko dan toleransi risiko yang telah ditetapkan. Pemantauan dilakukan oleh unit kerja pelaksana maupun oleh Satuan Kerja Manajemen Risiko. Hasil pemantauan disajikan dalam laporan secara berkala yang disampaikan kepada Manajemen dalam rangka mitigasi risiko dan tindakan yang diperlukan.

for implementing risk management in each risk management unit. Evaluation and updating of Risk Management Policies and Procedures are carried out periodically or in the event of significant changes that affect BWS business activities.

The risk management policy is outlined in the Bank's Business Plan, which is prepared periodically at the beginning of each year following developments/changes that occur both internally and externally and take into account the impact on capital, especially the fulfillment of the Minimum Capital Adequacy Requirement (KPMM). One of the bank's strategies for carrying out risk control, BWS determines risk tolerance and risk limits which are reviewed periodically with approval up to the level of the Board of Directors through committee meetings or circulation to the Board of Directors according to the level of authority.

Pillar 3

Adequacy of Risk Identification, Measurement, Monitoring, and Control Processes and Risk Management Information Systems

The risk management process includes the stages of identification, measurement, monitoring, and risk control of 8 (eight) types of risk which are carried out to analyze the source and possibility of the risk occurring and their impact on BWS. At the same time, risk measurement is carried out to measure the Bank's risk exposure as a reference for carrying out risk control. Risk measurement is carried out periodically, both quantitatively and/or qualitatively, according to the regulator's measurement method or internal methods developed based on best practices in risk measurement. Risk measurement is also equipped with stress testing for credit, market and liquidity risks to anticipate unfavorable conditions.

The process of monitoring risk against the results of risk measurement is carried out to ensure that threats have been appropriately managed, among others, by monitoring the established risk limits and risk tolerances. The implementing work unit and the Risk Management Work Unit carry out monitoring. Monitoring results are presented in periodic reports submitted to Management to mitigate risks and necessary actions.

Pilar 4

Sistem Pengendalian Intern Manajemen Risiko

Sistem pengendalian intern diimplementasikan di BWS dengan menggunakan model *Three Lines of Defense* yang terdiri atas Pemilik risiko (*Risk Taking Unit*) sebagai *first line of defense* yang melakukan pengelolaan terhadap risiko yang melekat di bisnis dan fungsinya. Satuan Kerja Manajemen Risiko, Satuan Kerja Kepatuhan bertindak sebagai *second line of defense/risk control unit* dan Satuan Kerja Audit Intern (*SKAI*) bertindak sebagai *Third Line Of Defense/Risk Assurance* unit yang bertanggung jawab kepada Direktur Utama dan bertugas secara independen untuk memastikan kesesuaian proses penerapan manajemen risiko dan sistem pengendalian internal dengan kebijakan dan prosedur yang ditetapkan serta dengan ketentuan dari Regulator.

Satuan Kerja Manajemen Risiko

Risk Management Work Unit

Satuan Kerja Manajemen Risiko berperan dalam mengoptimalkan return dan melindungi modal terhadap risiko. Sebagai *Second line*, Satuan Kerja Manajemen Risiko melakukan *continuous monitoring* untuk memastikan pelaksanaan pengendalian internal oleh *first line*. Menyadari bahwa pengelolaan risiko menjadi tanggung jawab seluruh unit kerja di Bank, maka keberhasilan pengelolaan risiko ditentukan oleh adanya *risk awareness* di seluruh unit kerja Bank yang disertai dengan kemampuan teknis yang memadai. Oleh karena itu, BWS senantiasa meningkatkan kapabilitas dan pengetahuan seluruh pegawai terutama dalam hal pengelolaan risiko, dengan menyelenggarakan pelatihan internal maupun eksternal secara berkala.

Manajemen Permodalan

Capital Management

Perhitungan rasio kewajiban modal minimum telah sesuai dengan Peraturan OJK Nomor 11/POJK.03/2016 tentang Kewajiban Penyediaan Modal Minimum Bank Umum yang berlaku sejak 2 Februari 2016 dan sebagaimana telah diubah dengan Peraturan OJK Nomor 34/POJK.03/2016 tentang Perubahan atas Peraturan OJK Nomor 11/POJK.03/2016.

Bank menghitung modal minimum sesuai profil risiko pada posisi Desember 2022.

Pillar 4

Risk Management Internal Control System

The internal control system is implemented at BWS using the *Three Lines of Defense* model, which consists of Risk Taking Units as the first line of defense that manages the risks inherent in the business and its functions. The Risk Management Work Unit and the Compliance Work Unit act as the second line of defense/risk control. And the Internal Audit Work Unit (*SKAI*) acts as the Third Line of Defense/Risk Assurance unit, which is responsible to the President Director and is tasked independently of ensuring conformity of the process of implementing risk management and internal control systems with established policies and procedures as well as provisions from Regulators.

The Risk Management Work Unit plays a role in optimize returns and protect capital against risk. As a second line, the Risk Management Work Unit conducts continuous monitoring to ensure the implementation of internal control by the first line. Recognizing that risk management is the responsibility of all work units in the Bank, the existence of risk awareness in all work units of the Bank and adequate technical capabilities determines the success of risk management. Therefore, BWS constantly improves the capacity and knowledge of all employees, especially in risk management, by holding regular internal and external training.

The calculation of the minimum capital requirement ratio is by OJK Regulation Number 11/POJK.03/2016 concerning Minimum Capital Adequacy Requirements for Commercial Banks, which took effect on February 2, 2016 and as amended by OJK Regulation Number 34/POJK.03/2016 concerning Amendments to OJK Regulation Number 11/POJK.03/2016.

The Bank calculates the minimum capital according to the risk profile of the position in December 2022.

Pengelolaan dan Pengungkapan Eksposur Risiko serta Mitigasi yang Dilakukan oleh BWS

Management and Disclosure of Risk Exposure and Mitigation Conducted by BWS

• Pengelolaan Risiko Kredit

Ketidakpastian dan perlambatan perekonomian dikarenakan pengaruh masih adanya Pandemi COVID-19 selama tahun 2021 sangat berpengaruh pada kondisi perekonomian di Indonesia. Hal ini cukup berdampak pada kinerja dan kualitas kredit perbankan secara umum. Namun dalam kondisi ini Portofolio kredit BWS dapat tumbuh cukup agresif yaitu sebesar 18,70% pada tahun 2022. Rasio kredit bermasalah (Non Performing Loan) BWS dapat terjaga dan terus menunjukkan perbaikan dari 0,93% pada tahun 2021 menjadi 1,05% pada tahun 2022.

Selama tahun 2022, BWS sangat proaktif dalam upaya melakukan penyempurnaan pengelolaan kredit untuk mengantisipasi dan mengendalikan risiko kredit yang diakibatkan oleh kegagalan debitur dalam memenuhi kewajibannya selama kondisi Pandemi. Untuk mempertahankan kemampuan Bank menyerap risiko yang mungkin timbul dan mengantisipasi kondisi perekonomian yang tidak pasti secara bertahap BWS mengimplementasikan sistem peringatan dini (*early warning system*) yaitu suatu *monitoring* untuk mengidentifikasi potensi risiko sejak dulu yang digunakan sebagai indikator bagi tindakan lebih lanjut sebelum kredit jatuh menjadi *Net Performing Loan* melalui pengelolaan kredit kualitas rendah antara lain peningkatan fungsi *credit risk review* serta pembentukan *Task Force Team* yang beranggotakan lintas divisi untuk melakukan langkah-langkah penyelamatan dan penyelesaian kredit dengan lebih dulu dan terintegrasi.

• Credit Risk Management

Uncertainty and an economic slowdown due to the influence of the ongoing COVID-19 Pandemic in 2021 greatly affected economic conditions in Indonesia. This had quite an impact on the performance and quality of banking credit in general. However, under these conditions, the BWS loan portfolio can grow quite aggressively, amounting to 18.70% in 2022. The ratio of non-performing loans (Non-Performing Loans) BWS can be maintained and continues to show improvement from 0.93% in 2021 to 1.05% in 2022.

During 2022, BWS was very proactive in improving credit management to anticipate and control credit risk caused by debtors' failure to fulfill their obligations during Pandemic conditions. To maintain the Bank's ability to absorb risks that may arise and anticipate uncertain economic needs, BWS gradually implements an early warning system, namely a monitoring system, to identify potential risks early on, which is used as an indicator for further action before credit falls to Net Performing Loans through low-quality credit management, including improving the credit risk review function and forming a Task Force Team consisting of cross-divisions to carry out steps to save and settle credit in an earlier and integrated manner.

Dalam rangka pengelolaan risiko kredit BWS telah memiliki model rating berupa *internal rating system scoring* debitur untuk membantu analisa kualitas debitur dalam proses perkreditan. Untuk menjaga portofolio bank tidak terkonsentrasi pada debitur dan sektor ekonomi tertentu, maka BWS telah menetapkan pembatasan kredit sesuai *risk appetite*, sedangkan untuk mengantisipasi pelampauan BMPK, BWS telah menetapkan limit batas yang prudent yang disesuaikan dengan limit BMPK sesuai ketentuan regulator.

Sebagai bagian dari pengukuran risiko kredit dan untuk mengantisipasi terjadinya perubahan faktor makro baik dikarenakan pandemi, BWS secara berkala melakukan *stress testing* risiko kredit untuk menilai perubahan portofolio kredit dan pengaruhnya bagi bank serta kemampuan bank menghadapi kondisi tersebut.

In managing credit risk, BWS already has a rating model in the form of an internal rating system for debtors to help analyze debtor quality in the credit process. To keep bank portfolios from being concentrated on specific debtors and economic sectors, BWS has set credit limits according to risk appetite, while to anticipate exceeding the LLL, BWS has set prudent limits that are adjusted to the BMPK limits according to regulatory provisions.

As part of measuring credit risk and anticipating changes in macro factors due to a pandemic, BWS regularly conducts credit risk stress testing to assess changes in the credit portfolio and its impact on banks and the Bank's ability to deal with these conditions.

- » Disclosure of Net Claims Based on Risk Weighting after Calculating the Impact of Credit Risk Mitigation
 1. Disclosure of net receivables is carried out for asset exposure in the statement of financial position, exposure in administrative account transactions, and exposures that give rise to credit risk due to counterparty credit risk.
 2. Determination of portfolio categories, calculation of net receivables, and calculation of the impact of credit risk mitigation refer to the provisions of the OJK regarding guidelines for calculating risk-weighted assets for credit risk using a standard approach.
 3. Capital charges result from multiplying the RWA with the minimum KPMM ratio according to POJK regarding the minimum capital adequacy requirement for commercial banks.
 4. Filling example:

Banks have claims that fall into the category of corporate claims portfolio in the amount of IDR100,000,000,000.00 (one hundred billion rupiah). Shares do not have a rating, so they are subject to a risk weight of 100% (one hundred percent). Part of the said bill, namely IDR30,000,000,000.00 (thirty billion rupiah) is guaranteed by cash collateral with a risk weight of 0% (zero percent). Filling in the billing line to corporations is carried out as follows: IDR70,000,000,000.00 (seventy billion rupiah) is entered in the 100% (one hundred percent) risk weight column, and IDR30,000,000,000.00 (thirty billion rupiah) is documented in the 0% (zero percent) risk weight column.

Pemantauan terhadap pergerakan potensi risiko pasar dilakukan oleh Divisi *Treasury*, Divisi Manajemen Risiko, Divisi *Funding*, dan Divisi terkait yang tergabung dalam *Asset-Liability Committee* (ALCO).

Pemantauan dilakukan dengan metode valuasi *mark to market* perubahan nilai pasar pada portofolio yang dimiliki oleh Bank. Pengendalian risiko pasar dilakukan melalui penetapan maksimum eksposur untuk *unrealized loss* untuk surat berharga, Penetapan *limit* Posisi Devisa Neto (PDN), *Limit* maksimum perubahan *Economic Value of Equity* (EVE) pada IRRBB sesuai *hard limit* yang ditetapkan oleh Regulator, dan penetapan *limit cut loss*.

Pengukuran Risiko terhadap aktivitas Bank yang terkespose Risiko Pasar meliputi:

1. Risiko Pasar dengan Menggunakan Metode Standar meliputi:
 - a. Eksposur Suku Bunga (*Trading Book*)
 - Metode Risiko Spesifik
 - Metode Risiko Umum
 - b. Eksposur Nilai Tukar (*Banking Book* dan *Trading Book*)

- Market Risk Management

The Bank constantly monitors changes that occur in asset portfolios that are exposed to market risk. Business activities in the trading book and banking book portfolio are exposed to market risk due to potential movements in interest rates, exchange rates, and changes in the prices of securities held. The Treasury Division, Risk Management Division, Funding Division, and related Divisions, which are members of the Asset-Liability Committee (ALCO), are monitoring potential market risk movements.

Monitoring is carried out using the mark-to-market valuation method for changes in market value in the portfolio owned by the Bank. Market risk control is carried out by determining the maximum exposure for unrealized loss for securities, Setting limits on Net Open Position (NOP), and Maximum limits on changes in Economic Value of Equity (EVE) on IRRBB following the hard limit set by the Regulator, and setting cut loss limits.

Risk measurement of Bank activities exposed to Market Risk includes:

1. Market Risk using the Standard Method includes:
 - a. Interest Rate Exposure (Trading Book)
 - Specific Risk Method
 - General Risk Method
 - b. Exchange Rate Exposure (Banking Book dan Trading Book)
2. Interest Rate Risk in the Banking Book

Penerapan atas Pedoman Tata Kelola Perusahaan Terbuka

Implementation of Public Company Governance Guidelines

Road Map GCG yang diterbitkan Otoritas Jasa Keuangan (OJK) pada tahun 2014 memiliki dampak yang besar bagi perkembangan GCG di lingkungan dunia usaha. Penekanan pada transparansi, akuntabilitas, dan penyampaian informasi yang wajar menjadi bahasan yang dapat menjadi pegangan bagi entitas usaha, khususnya bagi perusahaan terbuka. Demikian pula dengan hak pemegang saham tanpa terkecuali, khususnya pemegang saham minoritas yang harus menjadi perhatian dari emiten atau perusahaan terbuka.

Secara umum, Bank sebagai perusahaan terbuka telah melaksanakan seluruh peraturan yang dikeluarkan OJK, dan akan terus berupaya melakukan perbaikan untuk menciptakan nilai tambah bagi pemegang saham dan pemangku kepentingan. Khususnya terkait pedoman Tata Kelola Perusahaan Terbuka yang diatur berdasarkan Peraturan OJK Nomor 21/POJK.04/2015 tanggal 16 November 2015 tentang Penerapan Pedoman Tata Kelola Perusahaan Terbuka, yang dijabarkan dalam Surat Edaran OJK Nomor 32/SEOJK.04/2015 tanggal 17 November 2015 tentang Pedoman Tata Kelola Perusahaan Terbuka. Pedoman tersebut yang memuat aspek, prinsip dan rekomendasi tata kelola perusahaan yang baik berguna untuk mendorong penerapan praktik GCG sesuai dengan praktik internasional yang patut diteladani perusahaan terbuka. Bank wajib menerapkan pedoman tersebut, dan jika belum menerapkannya, Bank wajib menjelaskan alasan tidak diterapkannya pedoman tersebut. Pengungkapan penerapan atas rekomendasi dalam pedoman tersebut disampaikan dalam laporan tahunan perusahaan terbuka.

Berdasarkan Surat Edaran OJK Nomor 32/SEOJK.04/2015 sebagai standar penerapan GCG yang mencakup 5 (lima) aspek, 8 (delapan) prinsip dan 25 rekomendasi penerapan aspek dan prinsip GCG. Rekomendasi penerapan aspek dan prinsip GCG dalam Pedoman Tata Kelola adalah standar penerapan aspek dan prinsip GCG yang harus diterapkan Bank. Ikhtisar kepatuhan Bank terhadap Peraturan dan Surat Edaran OJK tentang Pedoman Tata Kelola Perusahaan Terbuka dapat dilihat pada tabel di bawah ini.

The GCG Road Map issued by the OJK in 2014 significantly impacted the development of GCG in the business world. The emphasis on transparency, accountability, and delivering adequate information is a discussion that can be used as a guide for business entities, especially public companies. Likewise, the rights of shareholders without exception, especially minority shareholders, must be the concern of issuers or public companies.

In general, the Bank, as a public company, has implemented all regulations issued by OJK and will continue to make efforts to make improvements to create added value for shareholders and stakeholders. Particularly regarding guidelines for Public Company Governance which are regulated based on OJK Regulation Number 21/POJK.04/2015 dated November 16, 2015 concerning Implementation of Guidelines for Public Company Governance, which are described in OJK Circular Letter Number 32/SEOJK.04/2015 dated November 17, 2015 regarding Public Company Governance Guidelines. These guidelines, which contain aspects, principles, and recommendations of good corporate governance, help encourage the implementation of GCG practices by international conventions that public companies should emulate. Banks are required to apply these guidelines, and if they still need to implement them, the Bank is required to explain the reasons for not implementing these guidelines. Disclosure of the implementation of the recommendations in the guidelines is conveyed in the public company's annual report.

Based on OJK Circular Letter Number 32/SEOJK.04/2015 as a standard for GCG implementation, which includes 5 (five) aspects, 8 (eight) principles, and 25 recommendations for implementing GCG aspects and directions. The recommendations for implementing GCG aspects and regulations in the Governance Guidelines are the standards for implementing GCG aspects and principles that the Bank must implement. An overview of the Bank's compliance with OJK Regulations and Circular Letters concerning Public Company Governance Guidelines can be seen in the table below.

Sesuai arah dan kebijakan yang tertuang dalam RBB tersebut, di tahun 2023 BWS akan menjalankan langkah-langkah strategis untuk mencapai visi dan misi sesuai dengan arah kebijakan Bank sebagai berikut:

Strategic Work Plan and Policy

It is predicted that economic conditions in 2023 will still be quite challenging. Even though the national economic performance indicators have shown significant improvement, various shocks at the global level can have quite a big impact on the national economy.

BWS has considered various economic assumptions in preparing the 2023-2025 Bank Business Plan. In accordance with the directions and policies contained in the Bank Business Plan, in 2023 BWS will carry out strategic steps to achieve the vision and mission in accordance with the Bank's policy directions as follows:

- Distributing corporate loans focuses on expanding lending to local companies and Korean companies, both bilateral and syndicated to companies or business groups that have a good reputation and BWS continues to boost lending to priority sectors recommended by Bank Indonesia to encourage national economic recovery.*
- Increase in consumer credit that focuses on increasing growth through strengthening partnerships with strategic partners.*
- Increase in third party funds which focus on increasing low-cost funds.*
- Close monitoring of non-performing loan restructuring programs.*

In addition, in 2023 BWS will continue the marketing synergy strategy for the consumer and corporate businesses, namely by cross-selling Kupeg products, Motor Vehicle Loans, Residential Ownership Loans to corporate customers including increasing payroll amounts.

On the corporate side, BWS will search for new customers through referral assessments including supplier companies, vendors, or consultants for existing corporate customers to provide corporate credit facilities and offer retail credit for employees.

Selanjutnya BWS akan terus mengembangkan marketing channel dengan melakukan penambahan PKS baru dengan berbagai instansi dan perusahaan swasta, serta memaksimalkan potensi peningkatan volume kredit dari institusi eksisting yang sudah memiliki PKS.

BWS akan terus berinovasi dan meningkatkan layanan kepada nasabah untuk memberikan *customer experience* yang lebih baik sesuai dengan target pasar, dengan senantiasa menjajaki kebutuhan dan preferensi nasabah, memahami kondisi persaingan bisnis saat ini dan kepekaan organisasi bisnis terhadap pasar yang dihadapi.

Furthermore, BWS will continue to develop marketing channels by adding new PKS with various institutions and private companies, as well as maximizing the potential for increasing credit volume from existing institutions that already have PKS.

BWS will continue to innovate and improve services to customers to provide a better customer experience according to the target market, by constantly exploring customer needs and preferences, understanding the current conditions of business competition and the sensitivity of business organizations to the market they are facing.
